Oil Protection Act Training (OPA 90)

Subject Matter Experience and Expertise

Spectra Tech is providing Oil Spill Response training to include tailored training to the needs of onshore storage and distribution facilities in accordance with the National Preparedness for Response Exercise Program (PREP) Guidelines, 1994, Training Reference for Oil Spill Response, 1994, where applicable DoD 4715-5G, Overseas Environmental Baseline Guidance Document or Final Government Standards of the host nation, and an installations specific Facility Response Plan (FRP) or Spill Prevention and Response Plan (SPRP).

Spectra Tech is supporting DLA Energy to ensure facilities are in compliance with mandatory training as directed by the Oil Pollution Act of 1990 (OPA 90). Under the direction of DLA Energy, support under this contract has enabled the facilities to receive mandatory training in accordance with the applicable Oil Spill Response Training requirements. This contract has allowed DLA Energy to ensure all facility personnel are able to recognize their responsibilities in accordance with the prescribed laws and regulations. The training involves a mix of classroom and hands-on instruction to enable students to practice and demonstrate classroom learning as well as provide for the different ways that different students learn.

The OPA Training scope of services are to train facility personnel on the requirements set forth in the applicable Oil Spill Response Training Requirements in support of DoD petroleum storage facilities. Training addresses bulk petroleum storage facilities, tank-truck loading facilities, marine piers, and cross-country pipelines as appropriate.

Spectra Tech trainers have employed Instructional System Design theory and methodology into its development/modification of training products as demonstrated in its execution of annual certification training for military and civilian petroleum and fuel facility personnel at over 60 government-owned/contractor operated (GO/CO) Defense Fuel Support Points (DFSPs) and Fleet Industrial Supply Centers (FISCs). This training has been performed through the use of mobile training teams within the continental United States (CONUS) and outside continental United States (OCONUS).
